PROJECTS

Game On (Full Stack)
https://github.com/hannahm63/project-2 **|** https://game-on3.herokuapp.com

- A site where gamers can search game titles and see available platforms & reviews. They can also leave comments on games they've played.
- Created and maintained database to store user comments, communicated with 3rd party API to display game info and comments on page
- HTML5, CSS3, Bootstrap, Javascript, REST API, JSON, Node.js, Express, Handlebars, jQuery, MySQL, Sequelize

Memory Game (Front-end)
https://github.com/ToxicNerd13/Memory-Game **|** https://toxicnerd13.github.io/Memory-Game/

- A browser game that challenges the player to only click on each rearranging picture once.
- Used React to dynamically display photos and rearrange them when clicked, kept track of score and win/loss conditions
- HTML5, CSS3, Bootstrap, Javascript, React.js, Node.js, JSON

LIRI Bot (Back-end)
https://github.com/ToxicNerd13/liri-node-app

- A helpful bot that searches various API's for song, movie, and band information.
- Interfaced with API's for Spotify, BandsInTown, and OMDB to display requested info in the command line. Utilized a "random" command to choose a band/movie/song for indecisive users.
- Javascript, Node.js
